PROFESSIONAL MEMBERSHIPS

- Engineering Council, Sri Lanka (ECSL) – Member (Eng. Tech)
- ASHRAE – Student / Associate Member
- KNX Association – Community Member
- Skill Passport – TVEC, Sri Lanka

EDUCATION

- Lincoln University College
- B.Tech – Mechanical Engineering
- Dec 2025 – Present
- University College of Jaffna
- HND – Building Services Engineering Technology
- Mar 2019 – Jan 2024
- Eclipse Education
- Certificate – MEP Quantity Surveying
- Jun 2024 – Sep 2024
- Eclipse Education
- Skills Upgrade – MEP Engineering
- Aug 2025

TECHNICAL COMPETENCIES

- HVAC: chillers, AHUs, FCUs, VAV, VFDs, cooling towers
- LV Electrical: distribution boards, UPS, generators, lighting control
- Plumbing & Fire Protection: pipework, drainage, suppression systems
- BMS-integrated Controls: BACnet, Modbus, KNX, SCADA
- MEP Design Support & AutoCAD Drafting
- BOQ Preparation & MEP Quantity Surveying
- Site Supervision & Vendor Coordination
- Certified MEP Quantity Surveyor
- BACnet / KNX Certified
- SolidWorks
- MATLAB
- MS Offices
- Tia portal V20

CERTIFICATIONS & TRAINING

- BACnet Basics
- BACnet Cybersecurity
- ETS6 e-Campus – KNX Project Management Webinar
- Safety & Health for Engineers
- Machine Learning for Engineers
- Facility Manager's Guide to BAS

LANGUAGES

- Tamil – Native
- English – Professional Working Proficiency
- Hindi – Conversational
- Arabic – Basic
- Sinhala – Conversational

K. SURESHKUMAR

MEP | MECHANICAL ENGINEER (B.Tech)

PROFESSIONAL SUMMARY

MEP/Mechanical Engineer with 4+ years of experience in high-rise and building services projects, with practical exposure across HVAC, electrical, BMS, plumbing, and building automation systems in Saudi Arabia and Sri Lanka. Experienced in MEP site coordination, installation supervision, technical documentation, system inspection, testing and commissioning support, troubleshooting, and coordination with contractors, consultants, and multidisciplinary teams. Strong understanding of HVAC systems including AHUs, FAHUs, FCUs, VAVs, chilled-water systems, VFDs, and associated control systems, supported by hands-on BMS and automation experience. Familiar with MEP drawings, BOQs, technical specifications, project documentation, and construction coordination. I am currently pursuing a **B.Tech (Hons) in Mechanical Engineering Technology**, with additional qualifications in MEP Quantity Surveying, Project Management, and MEP Engineering. Seeking an MEP/Mechanical Engineer position within the construction sector, contributing to efficient project execution, quality, coordination, and successful delivery of building services systems.

PROFESSIONAL EXPERIENCE

BMS OPERATION & TECHNICAL SUPPORT | JUNE 2024 – PRESENT

Dr. Sulaiman Al Habib Medical Group — Sahafah Hospital, Riyadh, Saudi Arabia | Large-Scale Healthcare Facility, 24/7 BMS / MEP Operations.

Mechanical / HVAC

- Oversee operation and maintenance of all HVAC systems — chillers, Pumps, AHUs, FCUs, VAV systems, VFDs, and chilled water distribution — ensuring 99.5%+ availability in a 24/7 hospital environment in Riyadh's extremely hot climate.
- Monitor HVAC performance via BMS/SCADA platforms; analyze system trends to identify early-stage faults in chiller performance, AHU fan conditions, and control valve response before failures occur.
- Implement HVAC energy-saving measures including chiller sequencing optimization, VFD speed adjustments, and BMS pinpoint fine-tuning to reduce energy consumption and improve plant efficiency.
- Supervise HVAC preventive and corrective maintenance activities, coordinate OEM service visits for chiller and AHU major services.

Electrical

- Manage LV electrical systems across the hospital, including distribution boards (MDB, SMDB, DB), UPS systems, emergency generator sets, and lighting control systems.
- Oversee CCTV, access control, and fire alarm systems through the IBMS platform — monitoring system status, managing alarms, and coordinating specialist vendors for corrective works.
- Ensure all electrical maintenance activities comply with HSE standards and Permit-to-Work (PTW) procedures.

Plumbing & Fire Protection

- Oversee hospital plumbing systems including cold and hot water supply, domestic water pumps, drainage systems, and sanitary installations.
- Coordinate inspection and maintenance of fire alarm and fire suppression systems; ensure all fire protection systems always remain operational and compliant with safety regulations.

ASSISTANT ELECTRICAL ENGINEER | SEP 2023 – NOV 2023

New Solar — Colombo, Sri Lanka

- Participated in solar design, installation, and commissioning of solar PV systems for residential and commercial projects — covering electrical wiring, inverter configuration, and system monitoring setup.
- Conducted energy assessments and PV system sizing calculations; prepared BOQs and technical reports for solar project delivery.

MEP ENGINEERING INTERN | FEB 2023 – AUG 2023

Department of Buildings, Sri Lanka — Batticaloa, Sri Lanka

- Mechanical: Assisted in HVAC system design, ductwork layout preparation, and mechanical equipment schedules for government building projects.
- Electrical: Assisted in electrical wiring layout design, single-line diagram preparation, and panel schedules; supported site inspections of electrical installations.
- Plumbing: Supported plumbing system design, pipe sizing, and drainage layout preparation; gained hands-on experience in fire protection and drainage installations on site.
- Prepared MEP drawings using AutoCAD, estimated material quantities, and compiled BOQs and technical inspection reports.

ASSISTANT ELECTRICAL ENGINEER | MAR 2022 – NOV 2022

Keells Consultants (Pvt) – Colombo, Sri Lanka

- Assist the Electrical / MEP Engineering team in the design, installation, inspection, testing, commissioning, and maintenance of electrical systems for building services projects.
- Support electrical load calculations, drawing and specification reviews, equipment selection, site supervision, technical documentation, and coordination with mechanical, HVAC, BMS, fire protection, and other MEP disciplines.
- Monitor electrical installations for compliance with approved drawings, project specifications, and applicable standards, and assist with troubleshooting, testing, commissioning, and handover activities.

SITE SUPERVISOR – PIPELINE & CIVIL WORKS | MAR 2021 – OCT 2021

BPPE — Jaffna, Sri Lanka

- Supervised water pipeline installation works including pipe laying, jointing, pressure testing, and valve installation to MEP design specifications.
- Managed daily manpower, materials, and equipment; enforced HSE compliance and prepared daily inspection reports and progress updates for engineering management.
