## Facility Management Engineer

Riyadh, Saudi Arabia    k.sureshkumar199920@gmail.com    Mobile: 0578575624    [LinkedIn](#)

### PROFESSIONAL SUMMARY

Experienced Facility Management with 3+ years of progressive experience in integrated building management, HVAC and MEP systems operation, preventive maintenance, and facility services within large-scale healthcare and commercial environments. Currently serving as IBMS Lead at Dr. Sulaiman Al Habib Medical Group Sahafah hospital — one of Saudi Arabia's largest private hospital groups — overseeing 24/7 operation and maintenance of all building systems across a major hospital facility. Manages a team of 5 technicians, 10,000+ BMS monitoring points, and mission-critical MEP services including HVAC, electrical, plumbing, fire alarm, CCTV, and access control at 99.5%+ uptime. Skilled in facility management planning, asset management, vendor coordination, energy optimization, HSE compliance, and smart building technologies (BACnet, Modbus, KNX). Seeking Facility Management Engineer roles in Saudi Arabia, UAE, and the GCC.

### TECHNICAL SKILLS MATRIX

#### Facility Management

|                     |                       |                  |
|---------------------|-----------------------|------------------|
| Hard Services (MEP) | Soft Services         | Asset Management |
| CMMS                | Maintenance Planning  | SLA Management   |
| Vendor Management   | Contract Coordination |                  |

#### HVAC & Mechanical

|             |                |                |      |      |
|-------------|----------------|----------------|------|------|
| Chillers    | Cooling Towers | AHUs           | FCUs | VFDs |
| VAV Systems | Pumps          | Control Valves |      |      |

#### Energy & Sustainability

|                          |                        |                 |
|--------------------------|------------------------|-----------------|
| Energy Management        | Energy Monitoring      | Energy Auditing |
| IoT-BMS Integration      | Predictive Maintenance |                 |
| Smart Building Analytics |                        |                 |

#### Building Systems (IBMS / BMS)

|                       |       |                  |
|-----------------------|-------|------------------|
| IBMS / BMS Operations | SCADA | BACnet IP/MSTP   |
| Modbus RTU/TCP        | KNX   | Alarm Management |
| Building Automation   |       |                  |

#### Electrical & Safety Systems

|                 |                |                   |                    |
|-----------------|----------------|-------------------|--------------------|
| LV Distribution | UPS            | Generator Systems | Fire Alarm Systems |
| CCTV            | Access Control | Lighting Control  |                    |

#### Compliance & Administration

|                               |                         |                    |
|-------------------------------|-------------------------|--------------------|
| HSE Compliance                | Technical Documentation | Inspection Reports |
| Check list and PPM Activities | AutoCAD                 |                    |
| Team Leadership & Training    |                         |                    |

### PROFESSIONAL EXPERIENCE

#### BMS (Operation & Technical)

##### Dr. Sulaiman Al Habib Medical Group

Riyadh, Saudi Arabia  
June 2024 – Present

- Lead facility management operations for a major hospital, overseeing all hard services (HVAC, MEP, fire systems) and coordinating soft services to ensure seamless 24/7 facility performance.
- Manage a team of 5 technicians in preventive, corrective, and emergency maintenance across all building systems, maintaining 99.5%+ system availability for mission-critical hospital operations.
- Operate and manage BMS platform monitoring 10,000+ data points across HVAC, electrical, plumbing, fire alarm, CCTV, and access control systems.
- Investigate faults, manage alarm response, and coordinate specialist vendors to achieve average fault resolution within 2 hours, minimizing impact on hospital operations.
- Develop, schedule, and oversee preventive maintenance plans for all facility assets, ensuring compliance with maintenance schedules, SLAs, and regulatory requirements.
- Review energy consumption data and implement energy-saving improvements across HVAC and building services, tracking KPIs against facility benchmarks.
- Maintain comprehensive asset registers, maintenance records, inspection reports, and technical documentation for all building systems.
- Train and develop technicians on building systems, BMS operation, troubleshooting, and HSE compliance; conduct regular performance reviews.

**Systems:** BMS, HVAC (Chillers, AHUs, FCUs, Cooling Towers, VFDs), LV Electrical, Fire Alarm, CCTV, Access Control, Lighting, BACnet, Modbus, KNX, SCADA

#### Assistant Electrical Engineer

##### New Solar

Colombo, Sri Lanka  
Sep 2023 – Nov 2023

- Supported facility energy upgrade projects: design, installation, and commissioning of solar PV systems for residential and commercial buildings.
- Conducted energy assessments, system sizing, BOQ preparation, and technical reporting for facility energy projects.

- Assisted in the supervision of Mechanical, Electrical, and Plumbing (MEP) systems for public buildings.
- Participated in Split AC system design and equipment selection.
- Supported electrical works, including lighting systems, panel board wiring, and grounding.
- Helped estimate quantities for plumbing materials and participated in site-level supervision.
- Coordinated installation of CCTV systems, elevators, and fire safety systems under the engineer's supervision.
- Prepared AutoCAD drawings, as-built plans, and system schematics for documentation and approval.
- Maintained safety practices and site standards in compliance with local engineering codes.

Site Supervisor – Infrastructure & Pipeline  
BPPE

Jaffna, Sri Lanka  
Mar 2021 – Oct 2021

- Supervised daily site operations for civil and mechanical pipeline installation projects; managed field crew and Accounts.
- Prepared daily work reports, inspection records, and coordinated with project engineers and local authorities.

MAJOR PROJECTS

Healthcare Facility Management — Dr. Sulaiman Al Habib Medical Group, Riyadh, KSA

- Full facility management of a large hospital: 24/7 HVAC, MEP, fire, CCTV, access control, and BMS/IBMS operations supporting active clinical services.
- Maintained 99.5%+ building system uptime; implemented energy optimizations and preventive maintenance programs across all facility assets.
- Led team of 5 technicians; coordinated with 10+ specialist vendors for SLA-compliant maintenance delivery.

Government Building Projects — Department of Buildings, Sri Lanka

- MEP design support, site inspection, and documentation for multiple concurrent government facility projects, including HVAC, electrical, plumbing, and fire systems.

Research Project — B.Tech Mechanical

- Optimization of HVAC Energy Consumption in a Commercial Building using Smart Control Strategies
